DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 75-84 are rejected under 35 U.S.C. 102 (b) as being anticipated by JP 408143442 (see the entire translation supplied by applicant especially the claims, paragraph 8, abstract).

09/206,249 Art Unit: 1655

JP '442 teaches a water extract of soybeans used to treat eczema. Whole soybeans are ground and water is added and then the extract is filtered. The ground matter is heated but to a temperature which could read on 5 °C.

Applicant argues that JP '442 does not teach that the soybean in JP '442 was crushed or broken but if one looks at page 3, claim 6 of the translation of JP '442, it is clear that the soybeans were ground which would crush the soybean and that the soybean was heated anywhere from 5-100 °C. Thus, it could have been heated to only 5 °C which would have not denatured the protein.

Applicant argues in the response filed 9/21/2007 that the '442 publication clearly indicates that proteins are undesirable in the elute product and that the authors of the reference seek to reduce substantially or eliminate their presence in the elute, but this is only one possibility and the reference clearly teaches other temperatures such as mentioned above, i.e. 5 °C, not at just 20-30 °C.

Applicant next argues that at page 2 of the translation of '442 it is taught that the soybeans are not crushed and the liquid from the uncrushed soybeans is not likely to contain STI since (as applicant argues) STI cannot diffuse from the uncrushed soybeans or dehulled soybeans. First of all applicant has provided not evidence of this alleged fact. Secondly, assuming applicant is right (which the examiner is not saying that applicant is) the STI would still be in the extract thus reading on the claims, since the STI was not diffused as applicant has argued.

09/206,249 Art Unit: 1655

Claims 75-84 are rejected under 35 U.S.C. 102 (a) as being anticipated by JP 410226642 (abstract).

JP '642 teaches an extract of soybeans used to treat psoriasis. The extract can be applied in an ointment form, see abstract.

Applicant argues that the genistein has to be denatured in order to be ingested by humans but upon closer inspection of JP '642 it is clear that the extract is applied topically, i.e. as an ointment. Thus, it does not have to be ingested by humans as applicants argue.

Applicant argues in their response filed 9/21/2007, that "pure genistein" does not contain STI. While this is not agreed with, applicant provides no evidence of this allegation. Further, applicant presents US Patent 5141746 as evidence that genistein is extracted commonly with organic solvents. While this is noted, this patent only shows one particular method of extracting genistein and this still does not prove applicant's allegation. Further, JP '642 refers to "pure genistein" in the context that the soybean product which can have a low concentration is usable in place of pure genistein. Thus, not only is the reference not teaching pure genistein As alleged by applicants it is even promoting the use of a "low concentration product" as being as good as the "pure genistein" thus making applicant's arguments moot.

09/206,249 Art Unit: 1655

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael V. Meller whose telephone number is 571-272-0967. The examiner can normally be reached on Monday thru Thursday: 9:30am-6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terry McKelvey can be reached on 571-272-0775. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
